

Improve Quality and Productivity in Lettuce with NipsIt[™] Vegetables Insecticide

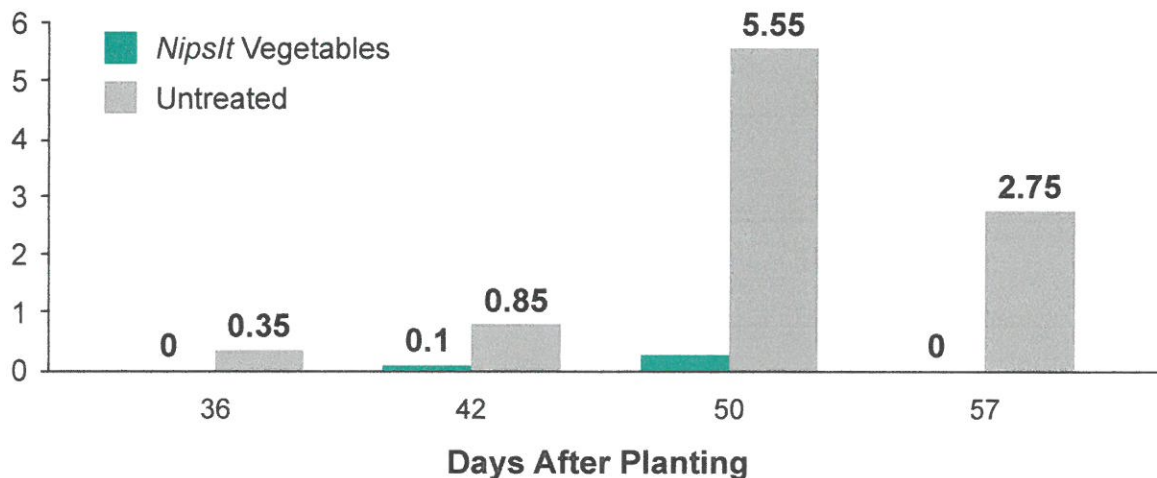

NipsIt Vegetables provides lettuce growers with a simple, seed-applied solution for protection against leafminer (suppression), red lettuce aphid and green peach aphid in full season lettuce.

NipsIt Vegetables offers:

- **Simplicity** – your lettuce seed comes complete with an effective insecticide that protects your seedlings from important sucking and chewing insects such as leafminer (from planting to thinning) and aphids (from planting to mid-season).
- **More vigorous growth** – protection of tender seedlings against leafminer (suppression) damage means a stronger and healthier plant throughout the season.
- **Season-long productivity** – seedlings are protected from insects, enhancing uniformity which provides production efficiencies all the way through harvest.

NipsIt Vegetables Controls Lettuce Aphid

Aphids per Plant

Trial conducted in Salinas, Calif.
Head lettuce, Telluride variety
Seed rate of 130,000/A
Planted June 20, 2011
